EDUCATION

- Jaypee University Of Engineering And Technology** Guna, India
Bachelor of Technology - Computer Science- AIML; GPA: 8.57 July 2024 - June 2028
Courses: Advanced Programming (Python, Java, C, C++), Data Structures, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases

SKILLS SUMMARY

- Languages:** Python, C++, C, SQL, JAVA
- Frameworks:** React, Express.js, Node.js, PyTorch, OpenEnv, NumPy, Pandas, Scikit, TensorFlow
- Tools:** Docker, GIT, PostgreSQL, MySQL, Power BI, MongoDB
- Platforms:** Linux, Web, Windows, Arduino, Raspberry, AWS,
- Soft Skills:** Leadership, Event Management, Writing, Public Speaking, Time Management

EXPERIENCE

- Summer Internship at IOCL,Mathura** In-Person
AI/ML intern (Full-time) June 2026 - July 2026
 - Full-Stack ML Architecture:** Engineered a FastAPI and React application for real-time Heavy Kerosene Flash Point prediction using 41 DCS sensor readings.
 - Model Optimization:** Resolved data leakage and overfitting using regularized linear models and cross-validation.
 - Deployment:** Dockerized the stack and optimized SQL queries to significantly reduce memory usage.
- Power BI Internship under the Microsoft Elevate AICTE Program** Remote
Feb 2026 – March 2026
 - Breach Analytics Dashboard:** Built a Power BI dashboard to visualize historical global cybersecurity incidents.
 - Data Processing:** Cleaned and transformed large datasets to extract actionable security insights.
 - Business Intelligence:** Applied data analytics techniques during the 4-week Microsoft Elevate AICTE program.

PROJECTS

- HY Kero Flash Point Prediction (Machine Learning, Full-Stack Development):** Real-time full-stack ML application for IOCL to predict heavy kerosene flash points, featuring a robust L1-regularized ML pipeline and an integrated secure AI chatbot. Tech: Python, FastAPI, React, SQLite, Docker (March '26)
- JUET Nexus (Web Development, Backend Proxy, Caching):** Modern student dashboard proxy for the university ERP system designed to improve user experience and reduce data access latency. Tech: TypeScript, Next.js, Fastify, Redis (2026)
- Loom2 (AI Integration, Full-Stack Web Development):** AI-powered digital wardrobe web app that automatically classifies clothing items by type and color, and recommends weather-aware outfits via an integrated Stylist AI. Tech: React, Node.js, AI APIs (2026)
- Global Cybersecurity Breach Analytics (Data Analytics, Business Intelligence):** Comprehensive analytics dashboard to visualize historical global breach trends, attack vectors, and incident patterns. Tech: Power BI
- GraphQL vs. REST Benchmark (API Architecture, Technical Research):** Technical research paper benchmarking API performance, latency, and developer experience across GraphQL and REST paradigms. Tech: GraphQL, REST
- File Converter (Web Utilities, Frontend Development):** A straightforward web-based file conversion utility for transforming common document and media formats. Tech: JavaScript (2026)

CERTIFICATIONS AND ACHIEVEMENTS

- Joint secretary: IETE Student's Forum (ISF), organizing campus tech events
- Winner, Elite Hack 1.0 - Secured first place among 100+ teams with an innovative AI solution
- Finalist, i.mobilathon 5.0 - Recognized for building scalable mobile-first architectures
- Microsoft Elevate AICTE Alumnus - Completed advanced training in cloud computing and AI technologies
- Oracle Certified AI Foundations Associate - 2025

VOLUNTEER EXPERIENCE

- Community Lead at Developer Student Clubs VR-AR-MR** Guna, India
Contributed to immersive club projects including VR Golf, AR Escape Room, and multiple AR shooters. Jun 2024 - Present
- Community Lead at Developer Student Clubs Rospinot & ISF Club** Guna, India
Built hardware projects using EV3, Arduino, and Raspberry Pi, and hosted the CodeSrijan Hackathon. Jun 2024 - Present
