Education

Jaypee University of Engineering and Technology

Guna, India

Bachelor of Technology, Computer Science and Engineering (AI/ML), GPA: 8.57/10

July 2024 – June 2028

- Relevant Coursework: Advanced Programming (Python, Java, C, C++), Data Structures, Analysis of Algorithms, Artificial Intelligence, Machine Learning, Computer Networking, Database Management Systems

Technical Skills

Programming Languages: Python, C++, C, Java, SQL

Frameworks and Libraries: React, Node.js, Express.js, PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas

Tools and Databases: Docker, Git, PostgreSQL, MySQL, MongoDB, Power BI

Platforms: Linux, Windows, AWS, Arduino, Raspberry Pi, Web

Core Competencies: Machine Learning, Data Analysis, Full-Stack Development, Leadership, Event Management, Public Speaking, Technical Writing, Time Management

Experience

Indian Oil Corporation Limited (IOCL), Mathura

On-site

AI/ML Intern (Full-time)

June 2026 – July 2026

- Developed a full-stack machine learning application using FastAPI and React to predict Heavy Kerosene Flash Point in real time from 41 DCS sensor readings.
- Identified and resolved data leakage and overfitting issues by applying regularized linear models and cross-validation, improving model reliability.
- Containerized the application stack with Docker and optimized SQL queries, reducing memory usage.

Microsoft Elevate AICTE Program

Remote

Power BI Intern

February 2026 – March 2026

- Built an interactive Power BI dashboard to visualize historical global cybersecurity incident data.
- Cleaned and transformed large datasets to extract actionable security insights.
- Applied data analytics and business intelligence techniques over a 4-week structured training program.

Projects

HY Kero Flash Point Prediction

March 2026

- Built a real-time full-stack ML application for IOCL to predict heavy kerosene flash points, featuring an L1-regularized ML pipeline and an integrated secure AI chatbot. (Python, FastAPI, React, SQLite, Docker)

JUET Nexus

2026

- Developed a student dashboard proxy for the university ERP system to improve user experience and reduce data access latency. (TypeScript, Next.js, Fastify, Redis)

Loom2

2026

- Built an AI-powered digital wardrobe app that classifies clothing by type and color and recommends weather-aware outfits via an integrated Stylist AI. (React, Node.js, AI APIs)

Global Cybersecurity Breach Analytics

2026

- Created a dashboard to visualize historical global breach trends, attack vectors, and incident patterns. (Power BI)

GraphQL vs. REST Benchmark

2026

- Authored a technical research paper benchmarking API performance, latency, and developer experience across GraphQL and REST. (GraphQL, REST)

File Converter

2026

- Developed a web-based utility for converting common document and media file formats. (JavaScript)

Certifications and Achievements

Winner, Elite Hack 1.0 – Secured first place among 100+ teams with an AI-based solution

Finalist, i.mobilothon 5.0 – Recognized for building scalable mobile-first architectures

Oracle Certified AI Foundations Associate (2025)

Microsoft Elevate AICTE Alumnus – Completed advanced training in cloud computing and AI technologies

Leadership and Volunteer Experience

IETE Student's Forum (ISF)

Guna, India

Joint Secretary

June 2024 – Present

- Organize campus technical events as part of the student forum leadership team.

Developer Student Clubs – VR/AR/MR and Rospinot/ISF Club

Guna, India

Community Lead

June 2024 – Present

- Contributed to immersive club projects including VR Golf, an AR Escape Room, and multiple AR shooter applications.
- Built hardware projects using EV3, Arduino, and Raspberry Pi, and hosted the CodeSrijan Hackathon.
